HISTORY AND CULTURE

Corfu town - an UNESCO monument - with great shopping, excellent restaurants/bars, museums, gardens, the airport is only half an hour's drive away (10km).

The Old Town of Corfu, east located with views to the mainland and Albania is located in a strategic position at the entrance of the Adriatic Sea, and has its roots in the 8th century BC. The three forts of the town, designed by renowned Venetian engineers, were used for four centuries to defend the maritime trading interests of the Republic of Venice against the Ottoman Empire.

In the course of time, the forts were repaired and partly rebuilt several times, more recently under British rule in the 19th century.

The mainly neoclassical housing stock of the Old Town is partly from the Venetian period, partly of later construction, notably the 19th century..
